SUMMARY

Results-driven finance and data analyst with hands-on experience in business intelligence, financial data modelling, and cross-functional reporting. Proficient in Power BI, Excel (advanced), DAX, MySQL, and Python-adjacent data tools, with a strong track record of transforming large, complex datasets into actionable financial insights. Experienced in customer behaviour analysis, revenue forecasting, KPI tracking, and competitor benchmarking across retail and direct-sales environments. Adept at collaborating with marketing and operational stakeholders to support data-driven decision-making and strategic planning.

SKILLS

- **Finance & Business:** Revenue Analysis, Financial Reporting, Budgeting & Forecasting, P&L Analysis, Sales Performance Tracking, Competitor Benchmarking, Market Analysis, Cost Analysis
- **Data Analysis & BI:** Power BI, DAX, Microsoft Excel (Pivot Tables, VLOOKUP, slicers, dashboards), MySQL, Data Visualisation, KPI Analysis, Statistical Analysis, Trend Analysis
- **Tools & Technologies:** Power BI, MySQL, Microsoft Excel (Advanced), Python (basic), WordPress, HTML/CSS/JavaScript, PHP
- **Core Competencies:** Data-driven Decision Making, Business Intelligence, Stakeholder Management, Cross-functional Collaboration, Data Storytelling, Report Automation, Customer Behaviour Analysis
- **Soft Skills:** Analytical Thinking, Attention to Detail, Communication, Problem Solving, Time Management

WORK EXPERIENCE

Reliance Retail, Business Analyst

Feb 2026 - June 2026

- Engineered a unified Power BI dashboard consolidating e-commerce and in-store sales data across 1.5M+ rows and 15+ spreadsheets using DAX measures, enabling real-time tracking of CRM performance, traffic channels, and competitor KPIs for marketing leadership.
- Conducted cross-functional financial and behavioural analysis across 1.5M+ data points to identify high-revenue customer flow zones, seasonal purchasing trends, and product performance patterns, delivering competitor benchmarking insights and informed pricing and placement strategies across Reliance Digital's physical and digital retail channels.
- Collaborated with marketing and operations stakeholders to translate data findings into strategic recommendations, supporting revenue optimisation and business planning decisions.

Paladin Organisation, Sales and Operations Associate

Apr 2025 - Jun 2025

- Completed a structured business training programme (60+ hours/week) covering sales operations, financial planning, client management, marketing strategy, and human resources.
- Executed field sales and fundraising campaigns engaging 80–100 prospects daily, achieving a consistent 20–25% conversion rate and contributing to weekly revenue targets through direct customer acquisition and relationship management.

TathyaShodh Development Consultants Pvt. Ltd., Website Design & Development Intern

Jun 2024 - Aug 2024

- Designed and developed the company's official website using WordPress, translating business requirements into wireframes and final layouts across 10+ web pages, improving user navigation and content structure.
- Managed client coordination, domain setup, and deployment across 5+ stakeholder meetings, delivering the project on time and aligned with organisational branding objectives.

PROJECTS

Customer Footfall and Revenue Analysis for Retail Stores

Tools: Microsoft Excel and Pivot Tables

- Built an advanced Excel-based financial analytics dashboard analysing \$698K+ in revenue and 149K+ customer transactions across 3 store locations, using Pivot Tables, slicers, and KPI visualisations to surface actionable sales and footfall trends.
- Conducted time-series, weekday, and product-level analysis to identify peak revenue hours (7–11 AM) and top-performing categories (Coffee & Tea contributing ~66% of total sales), enabling data-driven business decisions and operational planning.

Blockchain Solution to Enhance Carbon Footprint Tracking in Supply Chains

Tools: Ethereum, Solidity (Smart

Contracts), IoT Sensors, Python (LSTM/ML), Layer - 2 Scaling, REST API

- Co-designed a proposed blockchain architecture for supply chain carbon tracking, incorporating Ethereum smart contracts, IoT data integration, and LSTM based anomaly detection, enabling a theoretically immutable, real-time emissions logging framework across 3 supply chain stages
- Proposed a hybrid blockchain architecture with PoS consensus and Layer-2 scaling, projecting ~40% lower transaction latency, ~30% reduced energy consumption, and API-based interoperability with legacy carbon accounting systems based on architectural analysis.

CERTIFICATIONS

CISCO Networking Academy: Switching, Routing & Wireless Essentials, Enterprise Networking, Security & Automation

Smart India Hackathon, 2024: Certification of participation in the internal round of Smart India Hackathon conducted in MUJ

University of Illinois, Coursera, 2024: Global Strategy 1: How The Global Economy Works

EDUCATION

Manipal University Jaipur

B.Tech Computer Science and Engineering

- CGPA: 6.87

Sep 2022 - Dec 2026

Jaipur, Rajasthan
